SUMMARY OF NOTABLE INCIDENTS

CARBON MONOXIDE EMERGENCY:

On 10/18/2026, officers were dispatched to the 23000 block of Liberty St for an activated carbon monoxide alarm. Upon arrival, officers evacuated the residents and utilized a gas monitor. Elevated levels were detected throughout the home. Officers were able to narrow down the source to a faulty boiler or water heater. Both units were shut down, and the home was ventilated. A subsequent check with the gas monitor showed no hazard in the home. The resident was advised to contact a repair company to address the problem. None of the occupants suffered any negative effects from carbon monoxide, and treatment was refused.

DISTURBING THE PEACE:

On 10/18/2026, officers were dispatched to the 36000 block of Smithfield St. for a report of a loud party. Officers had already responded to the residence and warned the partygoers about the noise several hours prior. Officers could hear loud music coming from a stereo in the backyard near a bonfire. A responsible party was instructed to turn the music down, and he did so. He was issued a misdemeanor citation for disturbing the peace.
